Executive Summary

Economic Review

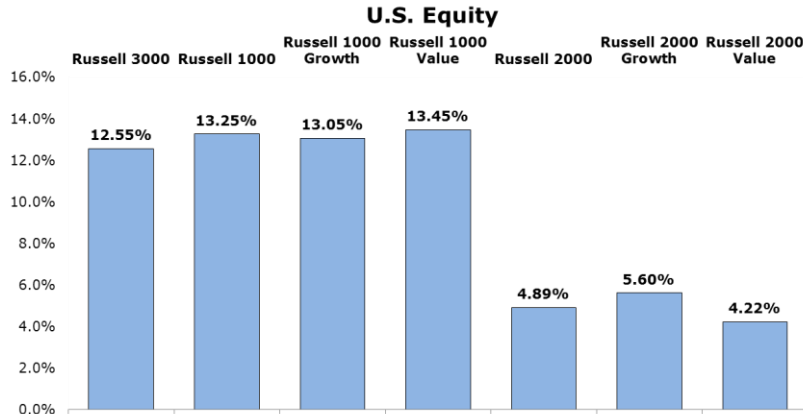

December 31, 2014		Key Economic Indicators			
CPI (all items) Seasonally adjusted	Monthly Change			Cumulative Change	
	Dec-14	-0.4		3-Month	-0.6
	Nov-14	-0.3		12-Month	0.7
	Oct-14	0.0		10-Yr Annual	2.1
Breakeven Inflation	10-Year	1.7			
Consumer Sentiment Unv. of Michigan Survey	Dec-14	93.6			
	Nov-14	88.8			
	1-Yr Ago	82.5		10-Yr Avg	77.1
Manufacturing Inst. for Supply Mgmt Purchasing Mngrs' Idx	Dec-14	55.5	Change in Manufacturing Sector		
	Nov-14	58.7	>50	Expansion	
	1-Yr Avg	55.8	<50	Contraction	

Note: Seasonally adjusted CPI data is utilized to better reflect short-term pricing activity.

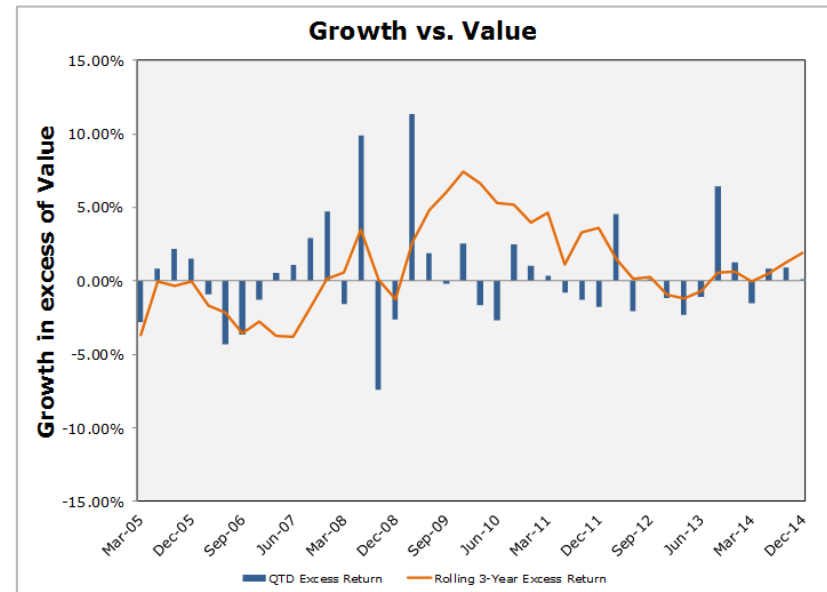

Data sources: Bureau of Economic Analysis, Bureau of Labor Statistics, Federal Reserve Bank of St. Louis, Barclays Capital

U.S. Capital Markets: Equity

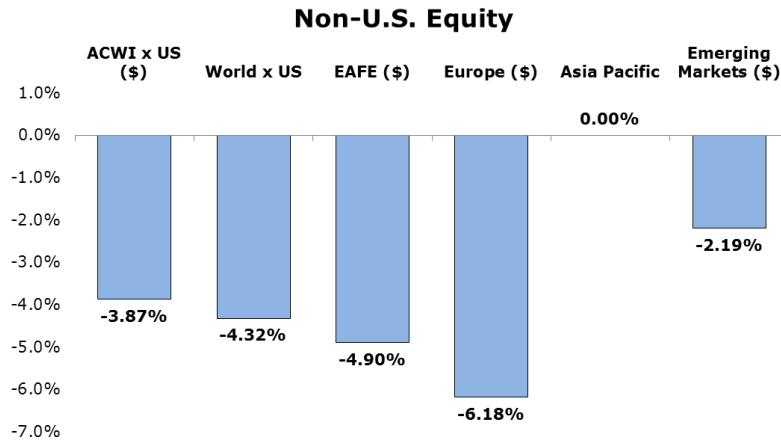

- U.S. stock market, as represented by the Russell 3000 Index, posted a return of 12.55% for the one-year period ending December 31, 2014, as investors were encouraged by record low unemployment numbers post the Great Recession and sustained low interest rate policy from the Federal Reserve. The U.S. stock market has rallied since the global financial crisis of 2008, generating strong positive returns for the past six years. Large capitalization stocks outperformed small capitalization stocks for the year.
- Small-cap growth stocks, as represented by the Russell 2000 Growth Index, were the strongest performing small cap stocks for the year, primarily driven by health care and IT stocks.

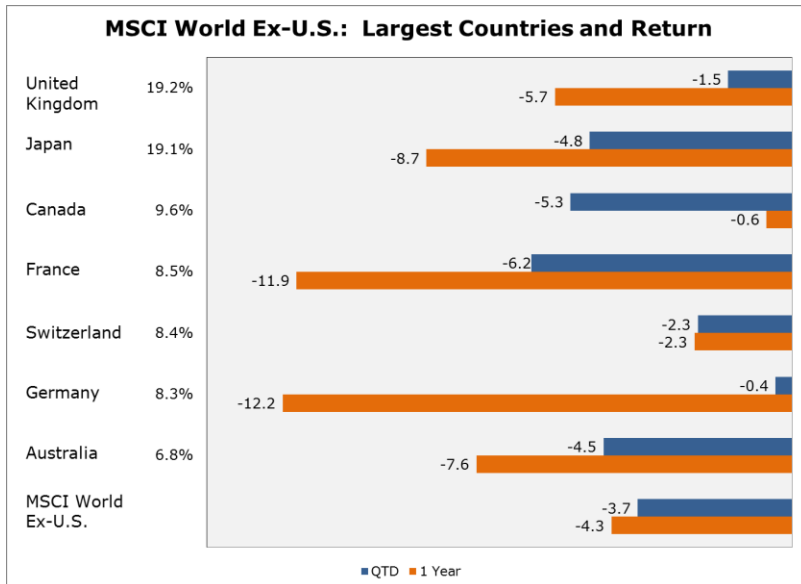

Data sources: Wilshire Compass, Wilshire Atlas

Non-U.S. Capital Markets

- Global equity markets, as represented by the MSCI ACWI ex-U.S. Index, returned -3.87% for the year, as growth slowed, particularly in the Eurozone. Over the past few years, most non-U.S. markets have struggled with slow GDP growth and political instability has hampered returns in emerging markets.
- Emerging markets returned -2.19% during the year, underperforming developed markets as concern grew over China's growth rate and as Russia struggled with a falling ruble and sinking oil prices which negatively affected other commodity-driven economies in emerging markets.

Data sources: Wilshire Compass, MSCI Barra

U.S. Capital Markets: Fixed Income

- U.S. Fixed Income markets, as represented by the Barclays U.S. Aggregate Index, returned 5.97% for the year.
- Ten-Year Treasury yields settled at 2.17% for 4Q14, 87 basis point lower than 4Q13.
- Yields declined at maturities of 5 years and longer as investors preferred longer duration treasuries.
- The Federal Reserve announced in December that they would be patient, planning to keep interest rates low at least through mid-year 2015.

Data sources: Wilshire Compass, Barclays Capital, U.S. Treasury

Real Assets

Real Assets

- TIPS, as represented by the Barclays U.S. TIPS Index, returned 3.64% for the year.
- REITs, as represented by the Wilshire U.S. REIT Index, returned 31.78% for the year as improving economic growth led to strengthening fundamentals.
- Commodities, as represented by the Bloomberg UBS Commodities Index, experienced the lowest return of all capital markets with -17.01% for the year due to falling oil prices and lower demand as a result of a slowdown in global growth.

Real Estate Valuation

NCREIF ODCE Fund Index Return

Data sources: Wilshire Compass, National Council of Real Estate Investment Fiduciaries

Performance Overview

- *LACERS' investment portfolio ("Fund") ended the quarter with a market value of \$14.07 billion, a gain of \$594 million from the previous year-end. The Fund's net of fee return was 5.67% for the year and 12.80% for the three-year period ending December 31, 2014.*
- *The Fund slightly outperformed its policy benchmark by 7 basis points (0.07%) for the year and 61 basis points (0.61%) for the three-year period.*
- *In comparison to other public funds with market values greater than \$10 billion in the TUCS (Trust Universe Comparison Service) peer universe, the Fund ranked in the 84th percentile for the year and in the 20th percentile for the three-year period.*
- *All asset classes except Non-U.S. Equity produced positive returns for the year.*
- *U.S. Equity, Non-U.S. Equity and Credit Opportunities underperformed their respective benchmarks, while Core Fixed Income outperformed its benchmark.*
- *Private Equity¹ underperformed, while Real Assets outperformed, their respective benchmarks for the year.*

Note: Due to the J-curve effect in early stages of a private equity fund's life, returns may lag prior to realization of proceeds in later years.

¹Name change from "Alternative Investments."

LACERS
LOS ANGELES CITY EMPLOYEES'
RETIREMENT SYSTEM

Fund Overview

	Actual	Target*	Min.	Max
U.S. Equity**	31.3%	24.0%	19.0%	29.0%
Non-U.S. Equity	28.1%	29.0%	24.0%	34.0%
Fixed Income	19.9%	19.0%	15.0%	22.0%
Credit Opportunities	3.5%	5.0%	0.0%	10.0%
Private Equity***	9.3%	12.0%	n/a	n/a
Real Assets	6.1%	10.0%	7.0%	13.0%
Cash	1.8%	1.0%	0.0%	2.0%

* Revised 1st Qtr 2012: decrease U.S. Equity from 37% to 24%; increase Non-U.S. Equity from 20% to 29%; decrease Fixed Income from 26% to 19%; allocate 5% in Credit Opportunities; increase Alternative Inv. from 9% to 12%; decrease Private Real Estate from 7% to 5%; allocate 10% in Real Assets. On May 13, 2014, an updated implementation plan was adopted by the Board to bring the asset classes within target ranges by 9/30/14.

**The underweight to Private Equity is allocated to U.S. Equity

Private Investments

Performance by IRR and Multiples¹ as of September 30, 2014

Private Equity	10-Year IRR	Since Inception IRR	Since Inception Equity Multiple
Aggregate Portfolio	13.17%	10.94%	1.50x
Core Portfolio	14.11%	11.30%	1.52x
Specialized Portfolio	N/A	6.52%	1.30x
<i>Russell 3000 + 300 bps</i>	<i>11.93%</i>	<i>10.31%</i>	<i>N/A</i>

Real Estate²	10-Year Return	Since Inception Return	Since Inception Equity Multiple
Total Portfolio (TWR)	3.44%	5.62%	N/A
<i>NFI ODCE + 80 bps</i>	<i>6.15%</i>	<i>6.71%</i>	<i>N/A</i>
Total Portfolio IRR	N/A	4.40%	1.20x

¹Since inception IRRs and multiples represent performance of active private equity and real estate funds in LACERS portfolio as of the date listed in the table heading. These numbers do not include performance of liquidated funds.

²Cash flow weighted benchmark return (IRR) is not available for the Real Estate Portfolio, so only time weighted return (TWR) is reported.

Total Fund Attribution*

	Portfolio Return	Policy Return	Asset Allocation	Interaction	Manager Performance	Trading	Total Alpha
1 Year	5.67%	5.59%	0.42%	0.07%	-0.56%	0.16%	0.08%
5 Years	10.19%	10.07%	0.34%	0.18%	-0.46%	0.06%	0.12%
10 Years	6.71%	6.73%	0.07%	-0.17%	-0.03%	0.11%	-0.02%

*Slight discrepancies may result due to rounding. For details on Interaction and Trading effects above, see the Definitions Section VI: Performance Attribution.

- Overweight to U.S. Equities relative to the policy target weight has been a source of value added over all three measurement periods
- Negative returns from manager performance in 1- and 5-year periods primarily due to underperformance of Private Equity and Real Estate relative to their respective benchmarks.

Total Fund – Contribution to 5-Year Total & Active Risk

- Public equities comprises 98% of total risk despite actual weighting of 59%.
- Private markets (Real Assets and Private Equities) comprises 99% of active risk as it is difficult to separate active from 'beta' exposures in those asset classes.
- U.S. Equities have provided modest active risk reduction.

5-Year Rolling Risk-Adjusted Active Returns

- Active returns are returns earned over/under benchmark return.
- Lower information ratio the past few years due to relative underperformance of watch list and terminated managers, and a higher allocation to passive managers.

Risk-adjusted active returns are referred to as "Information Ratio". Information Ratio = Excess return (alpha) / Excess risk (tracking error).

- LACERS U.S. Equity Portfolio is now very close in terms of size and style to the Russell 3000 benchmark.

Country Allocation

Benchmark – MSCI ACWI x U.S. Index

LACERS Non-U.S. Equity Composite

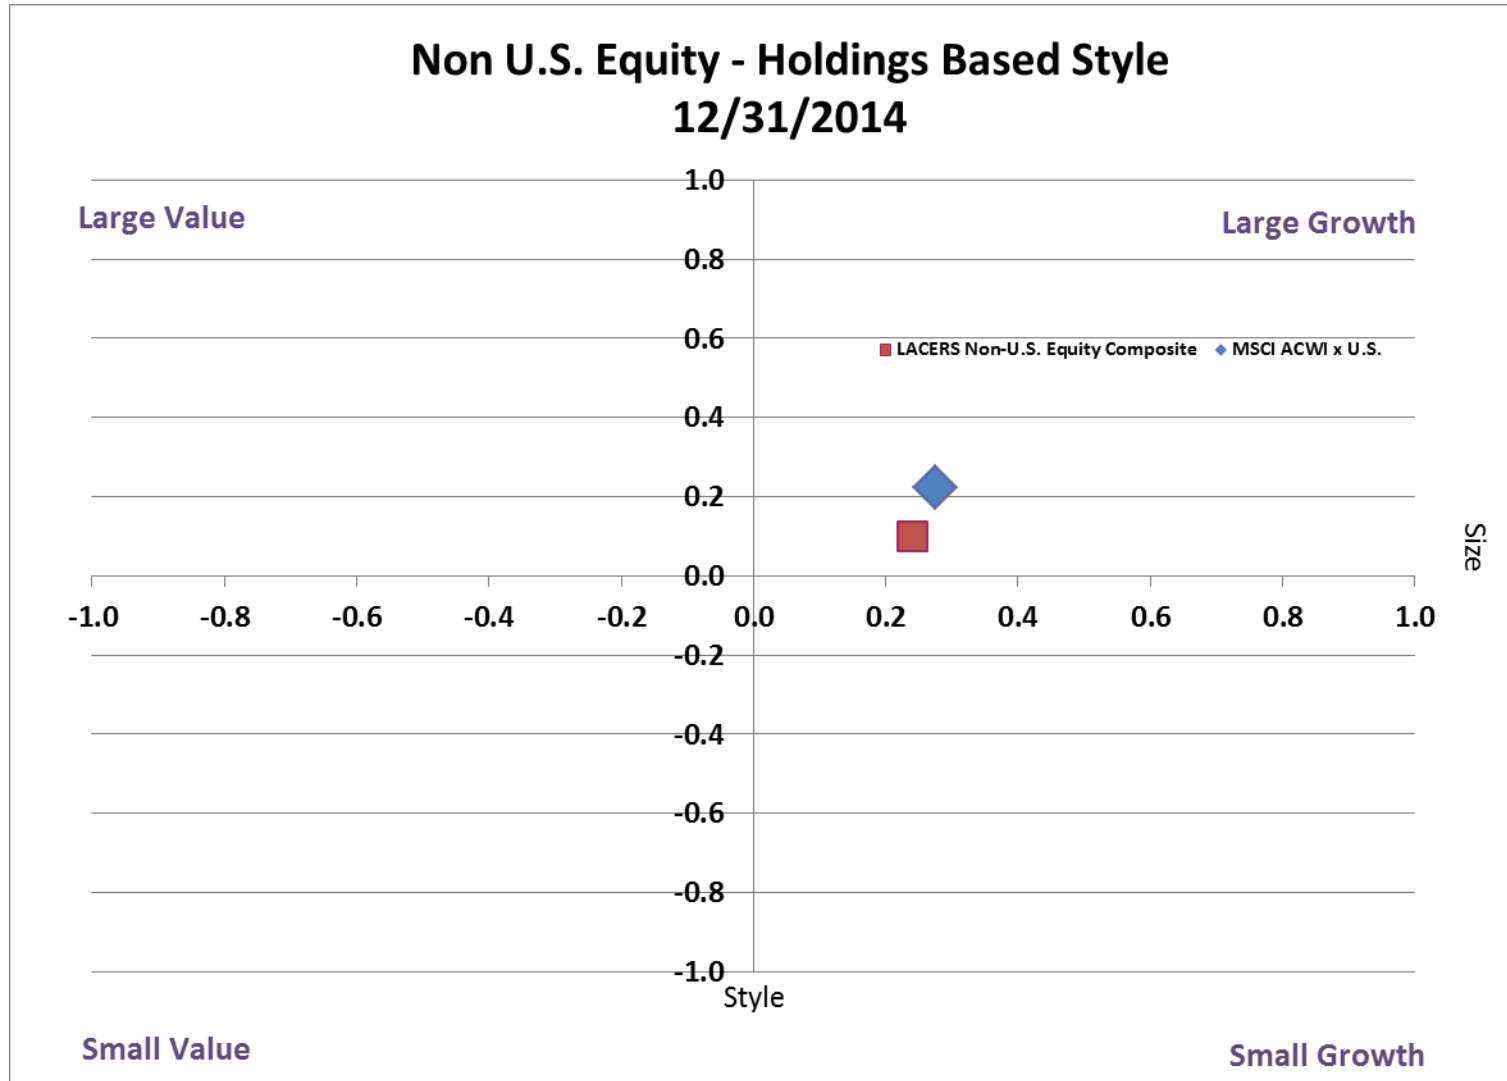

- LACERS Non-U.S. Equity Composite is slightly overweight Europe and underweight Emerging Markets. Underperformance during the one-year period is relative underperformance of recently terminated emerging markets equity managers.

5-Year Rolling Risk-Adjusted Active Returns

- Active returns are returns earned over/under benchmark return.
- Non-U.S. Equity's rolling information ratio has been positive for past 5 years.

Risk-adjusted active returns are referred to as "Information Ratio". Information Ratio = Excess return (alpha) / Excess risk (tracking error).

- LACERS Non-U.S. Equity Portfolio has exhibited modest small cap bias compared to MSCI ACWI x U.S. index, which provided some value-added over the year.

5-Year Rolling Risk-Adjusted Active Returns

- Active returns are returns earned over/under benchmark return.
- Despite dip in 2008, fixed income composite has provided mostly positive risk-adjusted active returns since inception.

Risk-adjusted active returns are referred to as "Information Ratio". $\text{Information Ratio} = \text{Excess return (alpha)} / \text{Excess risk (tracking error)}$.

- LACERS Core Fixed Income portfolio has slightly lower duration than benchmark.
- Portfolio is modestly lower quality versus benchmark.

Definitions

I. Asset Allocation

- Market %: market value as a percent of the total fund's market value.
- Target %: investment policy on target allocation for each asset classes.
- Minimum and Maximum %: range of allocation for each asset classes.

II. Policy Benchmarks

• Current (adopted January 24, 2012)

- ◆ U.S Equity: 24% Russell 3000
- ◆ Non-U.S Equity: 29% MS ACWI ex U.S. Net Div
- ◆ Fixed Income: 19% Barclays Capital (BC) Aggregate
- ◆ Credit Opportunities: 5% 65% Barclays U.S. Corp. High Yield 2% Cap / 35% JPM EMBI - Global Diversified
- ◆ Real Assets: 5% CPI + 500 bps
- ◆ Private Equity: 12% Russell 3000 plus 300 bps annually. Calculated on a dollar-weighted basis, and holding cash flows at 0% return for the first 36 months
- ◆ Cash: 1% 90-day Treasury Bill
- ◆ **Total:** 24% U.S. Equity; 29% Non-U.S. Equity; 19% Fixed Income; 5% Credit Opportunities; 10% Real Assets; 12% Private Equity; 1% Cash

• Prior (adopted October 13, 2009)

- ◆ U.S Equity: 27% Russell 3000
- ◆ Non-U.S Equity: 20% MS ACWI ex U.S. Net Div
- ◆ Core Fixed Income: 26% Barclays Capital (BC) Universal
- ◆ Private Real Estate: 7% NCREIF
- ◆ Private Equity: 9% Russell 3000 plus 400 bps annually. Calculated on a dollar-weighted basis, and holding cash flows at 0% return for the first 36 months.
- ◆ Cash: 1% 90-day Treasury Bill
- ◆ **Total:** 37% U.S. Equity; 20% Non-U.S. Equity; 26% Core Fixed Income; 7% Private Real Estate; 9% Private Equity; 1% Cash

III. Indices

- **Cash**

Salomon Brothers 3-Month Treasury Bills: an average of the last three 3-month treasury bill issues' monthly return equivalents of yield averages, which are not marked to market. Month-end discount yields are converted to bond-equivalent yields, then a simple average is taken, and that number is decomposed to a monthly return using the actual number of days in the month and a 365-day year.

- **Equity**

- ◆ **Dow Jones Industrial Average:** This index is the price-weighted average of 30 actively traded blue chip stocks.
- ◆ **NASDAQ:** A market value weighted index that measures all domestic and non-US based securities, more than 4700 companies listed on the NASDAQ stock market.
- ◆ **Russell Midcap Value:** contains Russell Midcap stocks having less-than-average growth orientation and are included in the Russell 1000 Value Index.
- ◆ **Russell 1000:** consists of the 1000 largest securities in the Russell 3000 Index. The Russell 1000 is capitalization-weighted.
- ◆ **Russell 1000 Growth:** contains Russell 1000 stocks having greater-than-average growth orientation. Stocks tend to exhibit lower dividend yields and higher price-to-book ratios, price-earnings ratios and forecast growth values than the Value universe. The index is capitalization-weighted (as opposed to equal-weighted).
- ◆ **Russell 1000 Value:** contains those Russell 1000 securities with a less-than-average growth orientation. Securities in this index tend to exhibit lower price-to-book and price-earnings ratios, higher dividend yields and lower forecasted growth values than the Growth universe. Russell 1000 Value is capitalization-weighted.
- ◆ **Russell 2000:** contains the smallest 2,000 stocks in the Russell 3000 Index, representing approximately 11% of the Russell 3000 total market capitalization. The index is capitalization-weighted (as opposed to equal-weighted).
- ◆ **Russell 2000 Growth:** contains those Russell 2000 securities with a greater-than-average growth orientation. Securities in this index tend to exhibit higher price-to-book and price-earnings ratios, lower dividend yields and higher forecasted growth values than the Value universe.
- ◆ **Russell 2000 Value:** contains those Russell 2000 securities with a less-than-average growth orientation. Securities in this index tend to exhibit lower price-to-book and price-earnings ratios, higher dividend yields and lower forecasted growth values than the Growth universe.
- ◆ **Russell 3000:** measures performance of the 3000 largest US companies based on total market capitalization. This index represents approximately 98% of the investable US equity market. The Russell 3000 is capitalization-weighted.
- ◆ **Standard and Poor 500:** the S&P, which represents approximately 75% of NYSE market capitalization and 30% of NYSE issues, contains 500 industrial, utility, transportation and financial companies in the U.S. markets (mostly

NYSE issues). The S&P is capitalization-weighted (as opposed to equal-weighted), calculated on a total return basis with dividends reinvested.

- ◆ **Morgan Stanley All Country World ex USA:** an arithmetic, market value-weighted average of approx. 1800 securities from outside the United States. The index is calculated on a total return basis, including reinvestment of gross dividends before deduction of withholding taxes.
- ◆ **Morgan Stanley World ex USA:** contains securities of all of the following developed counties, excluding U.S.: Austria, Belgium, Canada, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, United Kingdom, Israel, Australia, New Zealand, Singapore, Hong Kong, and Japan.
- ◆ **Morgan Stanley Capital International Emerging Markets Free:** contains securities of the following counties which are available to all investors regardless of local status: Argentina, Brazil, Chile, Colombia, Greece, India, Indonesia, Israel, Jordan, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Portugal, South Africa, Sri Lanka, Thailand, Turkey and Venezuela.
- ◆ **Morgan Stanley Capital International Emerging Markets ND:** contains securities of the following counties which are available to all investors regardless of local status: Argentina, Brazil, Chile, Colombia, Greece, India, Indonesia, Israel, Jordan, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Portugal, South Africa, Sri Lanka, Thailand, Turkey and Venezuela. The index is computed using the net return, which withholds applicable taxes for non-resident investors.
- ◆ **Morgan Stanley Capital International EAFE Value Gross:** contains securities of large and mid-cap in the following developed counties, excluding U.S. and Canada: Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, United Kingdom, Israel, Australia, New Zealand, Singapore, Hong Kong, and Japan.
- ◆ **Morgan Stanley Capital International EAFE Small Cap:** contains securities of small-capitalization in the following developed counties, excluding U.S. and Canada: Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, United Kingdom, Israel, Australia, New Zealand, Singapore, Hong Kong, and Japan.
- **Fixed Income**
 - ◆ **Barclays Capital Aggregate:** an aggregate of the Government/Corporate Bond Index, the Mortgage-Backed Securities Index, and the Asset-Backed Securities Index. The index contains fixed rate debt issues with at least one-year maturity, \$100 million par value outstanding, and investment grade ratings by Moody's, S&P or Fitch (in that order). Returns are market-value weighted inclusive of accrued interest.

- ◆ **Barclays Capital Universal:** This index contains the Barclays Capital Aggregate index bonds plus approximately 10% of the remaining index includes US High Yield, Eurodollar, Emerging Markets, 144A Private Placements, and CMBS bonds.
- ◆ **Barclays Capital US Govt/Credit Intermediate:** This index is a sub-component of the Barclays Capital Aggregate index. Bonds consist of the US Treasury, US Agency (non-MBS), and US Investment-grade credit holdings with a maturity range of 1 to 10 years.
- ◆ **Barclays U.S. High Yield 2% Capped:** This index is an unmanaged index that covers U.S. corporate, fixed-rate, non-investment grade debt with at least one year to maturity and at least \$150 million in par outstanding. Index weights for each issuer are capped at 2%.
- ◆ **Barclay U.S. TIPS:** The index includes all publicly issued, investment grade U.S. Treasury inflation-protected securities that have at least one year remaining to maturity.
- ◆ **Bond Rating Methodology:** Bond ratings are intended to characterize the risk associated with holding a particular bond or categories of bonds. These ratings are the risk assessed by the market and that the bond issuer must pay to attract purchasers to the bond. These ratings are expressed as a series of letters and sequences.

Rating Categories in descending order:

- ◇ **AAA:** The best quality rating, stable cash flows, very protective bond covenants, very low probability of default.
- ◇ **Aa:** The second best rating. Stable cash flows, less protective bond covenants, very low probability of default.
- ◇ **A:** Stable cash flows, less protective bond covenants, long-term probability of default is higher than AAA or Aa.
- ◇ **Baa:** Medium quality rating, reliable cash flows short term, less-reliable cash flows long term, bond covenants offer limited protection. Moderate probability of default. Downgrade to a lower rating is also possible. Baa bonds are the lowest rating still considered 'investment grade.
- ◇ **Ba thru B:** Highly speculative. Long-term assurance of cash flows and protective elements are low. Purchasers of these bonds generally specialize in assessing credit risk of specific bond issues. Much higher spreads versus investment grade bonds provide the incentive for purchasers. High default or downgrade risk.
- ◇ **Caa thru C:** Poor standing. Either close to default or in default. Highly probable loss of principal.
- ◇ **D:** Coupon payments were not paid on the due date which puts the bond in default. Unless both Protective covenants and issuer assets are adequate (not likely), holder loses all likelihood of recovering principal.

- **Private Real Estate**

NCREIF Property Index: the NPI contains investment-grade, non-agricultural, income-producing properties which may be financed in excess of 5% gross market value; were acquired on behalf of tax exempt institutions; and are held in a fiduciary environment. Data is collected quarterly from a membership of investment managers and plan sponsors. Returns are gross of fees; include income, realized gains/losses, and appreciation/depreciation; and are market-value weighted. Property values are determined by consistent appraisal methodology and sold properties are removed in the quarter of the sale (the historical data remains). Current quarter performance is preliminary.

NFI-ODCE Index: It is an index of open-end diversified Core strategy funds with at least 95% of their investments in the U.S. markets. The ODCE is the first of the NCREIF Fund Database products, created in May 2005, and is an index of investment returns reporting on both as historical and current basis. The ODCE Index is capitalization-weighted and is reported on an gross and net of fee basis. Measurement is time-weighted and includes leverage.

IV. Universe Comparison

All Northern Trust Universes are gross of fees. Universe breaks are at 10, 25, 50, 75 and 90 percentiles.

- **TUCS Plan Universes**

Published on a quarterly basis using monthly observations. Over time, the plan population members will change due to new plans being introduced and other plans closing or leaving the universe.

Public Funds

Includes the range of performance of all Public Funds greater than 10 billion dollars. Monitored by the Wilshire's Trust Universe Comparison Services Group. Plans include state and municipal plans and systems.

- **Manager Universes**

Created using the performance of managers used by sponsor subscribers to the Risk & Performance Services Group (RPS). Each occurrence of a manager is considered as an observation. The manager universes are used to describe the actual experience of plan sponsors use of the managers; no manager supplied representative portfolios or composites are used in the creation of the universes. All occurrences of a manager are included in the magnitudes they are used by the sponsors; no stratification or judgments are introduced by RPS to alter a manager's representation. Manager portfolios are used from all market segments (ERISA, Public, Foundation & Endowments, and Wealth) since managers

are hired to fulfill a specific policy objective that is not unique by plan type. Inclusion in a universe is based upon quantitative screening using the criteria described; an RPS analyst determines the comparison of a manager to this style background for reporting purposes. The portfolio criteria are applied as the average of the values over the time period being observed and not simply the current point in time value.

◆ **U.S. Equity - Large Cap Core**

Includes portfolios with a portfolio average market capitalization greater than \$10 billion but not displaying any significant growth or value bias. The Barra Growth and Barra Book to Price risk factors are used to determine style orientation. Most of the portfolios also display a market-like beta.

◆ **U.S. Equity - Large Cap Growth**

Includes portfolios with a portfolio average market capitalization greater than \$10 billion. Portfolios will also display a significant growth bias as represented by a Barra Growth Risk Factor in the top 40% of all US equity portfolios and a Barra Price/Book score in the bottom 70% of all US equity portfolios monitored by RPS. Most growth portfolios display an above market beta.

◆ **U.S. Equity - Large Cap Value**

Includes portfolios with a portfolio average market capitalization greater than \$10 billion. Portfolios will also display a significant value bias as represented by a Barra Price/Book score in the top 30% of all US equity portfolios monitored by RPS. Most value portfolios display a below market beta and above market dividend yield.

◆ **U.S. Equity - Small Cap Growth**

Includes portfolios with a portfolio average market capitalization of less than \$2 billion. Small Cap Growth portfolios will also display a growth bias as represented by a Barra Growth Risk Factor in the top 31% of all US equity portfolios monitored by RPS.

◆ **U.S. Equity - Small Cap Value**

Includes portfolios with a portfolio average market capitalization of less than \$2 billion. Small Cap Value portfolios will also display a value bias as represented by a Barra Price/Book score in the top 27% and a Barra Growth factor score in the bottom 31% of all US equity portfolios monitored by RPS.

◆ **Non-U.S. Equity - Developed Markets**

Includes all managers investing in developed markets outside of North America. The majority of the portfolios in this universe are EAFE-oriented but may contain an opportunistic allocation to emerging markets equity (extended EAFE). There are a few regional non-US equity managers (Europe & Pacific Basin) also represented.

◆ **Non-U.S. Equity - Emerging Markets**

Includes all managers investing in emerging markets. The universe includes emerging markets managers that are diversified across all emerging markets as well as specialists in regional emerging markets.

◆ **U.S. Core Fixed Income**

Includes all managers, active and passive, investing in US Fixed Income.

◆ **Credit Opportunities**

Includes all managers, active and passive, investing in US high yield and emerging market debt managers.

◆ **Public Real Assets**

Includes all managers investing in Public REITS, TIPS, Commodities, and Multi Asset Real Asset/Return managers.

V. Investment Performance

- Time: the internal rate of return (accounting for daily cash flows) monthly based on trade-date, full accrual accounting, and using market values. For periods of greater than one month, a time series of linked monthly returns is maintained, introducing a time weighted effect.
- The Private Real Estate and the Private Equity returns are lagged one quarter.
- The LACERS Total Fund return is dollar-weighted to include Private Equity.

VI. Performance Attribution

• **Holdings-Based Attribution.**

U.S. Equity, Non-U.S. Equity, and Fixed Income tables are Holdings-based. The table details various attribution subcategories which impacted each manager's performance such as: selection, weighting, duration, yield, quality, etc.

- **Interaction**
Captures the interaction of managers' performance and the difference in asset class weighting
- **Trading**
Captures the contribution to excess return from trading activity during the period. The trading effect is the difference between the buy and hold return of each asset class composition and the calculated portfolio return.

VII. Terminology

- **Duration:** A measure of the sensitivity of the price (the value of principal) of a fixed-income portfolio given a 1% change in the US Treasury yield curve (interest rates). A portfolio with a duration of 4 would be expected to lose 4% of its value when interest rates rise 1%. Duration is expressed as a number of years. Rising interest rates mean falling bond prices, while declining interest rates mean rising bond prices.
- **Information ratio:** A ratio of portfolio returns above the returns of a benchmark (usually an index) to the volatility of those returns. The information ratio (IR) measures a portfolio manager's ability to generate excess returns relative to a benchmark, but also attempts to identify the consistency of the investor. This ratio will identify if a manager has beaten the benchmark by a lot in a few months or a little every month. The higher the IR the more consistent a manager is and consistency is an ideal trait.
- **Standard deviation:** A statistical measure of volatility or the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution. A manager with a one-year return of 5% and a standard deviation of 5, indicates the range of returns for this manager will likely fall between 0% and 10% during most annual time periods.
- **Tracking error:** A measure of the difference between returns of the portfolio and that of the benchmark it was attempting to imitate; reported as a "standard deviation percentage" difference.

U.S. Equity Manager Performance

Aronson, Johnson & Ortiz

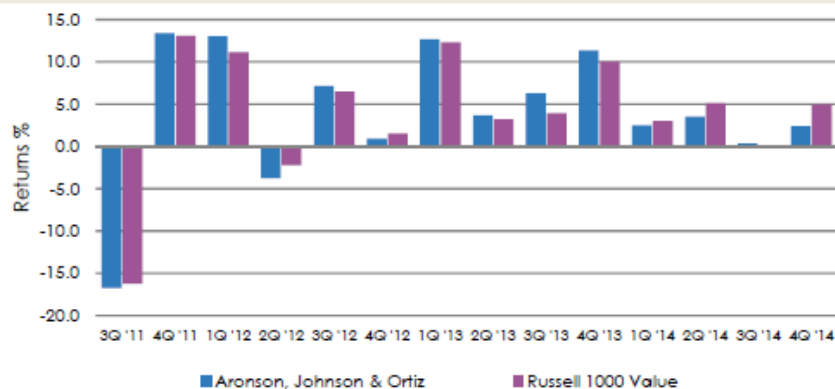

Objective

Outperform the benchmark by 300 bps, annualized over a full market cycle (normally 3-5 years).

Strategy

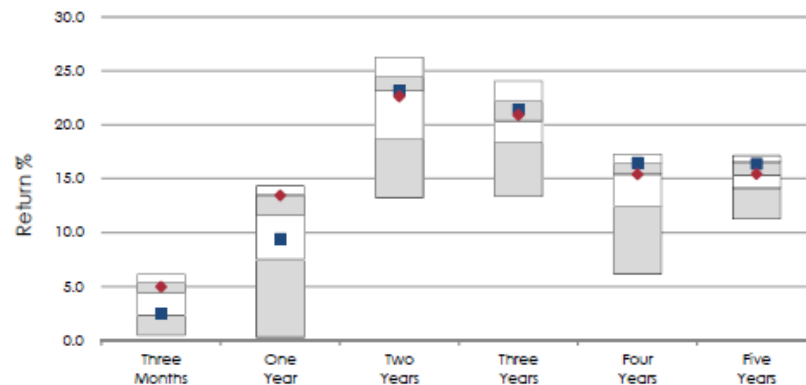

Aronson invests in US stocks with large market caps, low P/E ratios and lower historical earnings per share that are expected to increase.

Performance - Quarterly Rate of Return vs Benchmark

Quartile Rankings

1 Performance shown above is based on gross of fees.

HIMCO

Objective

Outperform the Barclay U.S. TIPS Index by 30 bps, annualized over a full market cycle (normally 3-5 years).

Strategy

HIMCO's approach to investing in the TIPS markets is through prudent selection of issues with varying maturities and effective sector rotation between TIPS and nominal treasuries.

Performance - Monthly Rate of Return vs Benchmark

Performance - Net Returns%

	LCQ	1 Yr.	2 Yrs.	3 Yrs.	5 Yrs.	Gross ITD Return	Inception Date
HIMCO	-0.4	--	--	--	--	-2.7	Jul-2014
BC (LB) US TIPS	0.0	--	--	--	--	-2.3	
Excess Returns	-0.4	--	--	--	--	-0.4
